SUMMARY

Security and privacy-focused Software Engineer working across AI Engineering, UI/UX Research, and Cybersecurity, with a focus on building intelligent, secure, reliable, maintainable, user-centered, and privacy-conscious software.

EXPERIENCE

Founder & CEO

Sep 2025 - Present

PT Secure Modern Technology Indonesia · Self-employed · Palembang, Indonesia · Hybrid

Passionate Founder & CEO with a strong commitment to building secure, privacy-first products without compromising on exceptional user experience. I combine strategic leadership with a high standard for UI/UX design, ensuring that every product decision balances robust security, transparent privacy practices, intuitive functionality, and refined visual execution. My focus is on creating digital experiences that users can trust products that feel effortless to use while being thoughtfully engineered to protect their data and respect their privacy.

EDUCATION

Indo Global Mandiri University

Sep 2024 - Present

Bachelor of Computer Science

I'm currently studying Computer Science at one of the most well-known private universities in Palembang, Indonesia. As a Computer Science student, I stay closely attuned to how rapidly technology and the internet are evolving especially in this AI-driven era where progress moves at an extraordinary pace. This constant acceleration pushes me to keep learning continuously, because standing still for even a moment risks falling behind.

SKILLS

Cybersecurity	Governance, Risk, & Compliance (GRC), Identity & Access Management (IAM), Cryptography
Artificial Intelligence	Agentic Engineering, Retrieval-Augmented Generation (RAG), AI Governance & Compliance, Model Context Protocol (MCP)
